

FASTLOCK™ fittings are not currently approved for use with gas or fire protection applications.

FASTLOCK™

PRESS FITTINGS FOR STEEL PIPE

LIST PRICE BOOK

**MALLEABLE CAST IRON PRESS FITTINGS
FOR SCH. 10 – 40 BLACK & GALVANIZED STEEL PIPE**

Phone: 877.228.9246 • Fax: 877.232.9246 • E-mail: info@cimberiovalve.com • www.fastlockfittings.com

THE QUICKEST & EASIEST WAY TO CONNECT STEEL PIPE

FASTLOCK™ fittings provide the quickest and easiest way to connect schedules 10 through 40 black and galvanized ASTM A53 compliant steel pipe.

FASTLOCK™ fittings are available in a complete range of sizes from ½" – 2".

FASTLOCK™ fittings install without the use of threading dies, pipe sealants, or pipe wrenches; significantly reducing average installation time, saving time and money. Because they connect without wrenches, **FAST-LOCK™** fittings reduce stress on joists and hangers during installation.

FASTLOCK™ fittings feature "Sure Connect™" technology that ensures unpressed connections are detected during pressure testing.

FASTLOCK™ press jaws are compatible with most press tools on the market, including Ridgid®, Rothenberger®, REMS®, and Stanley® VIRAX®.

FASTLOCK™ fittings feature a specialized, corrosion-resistant, malleable cast iron body with stainless steel fastening rings and EPDM sealing gaskets.

Applications include water, HVAC, and compressed air systems.

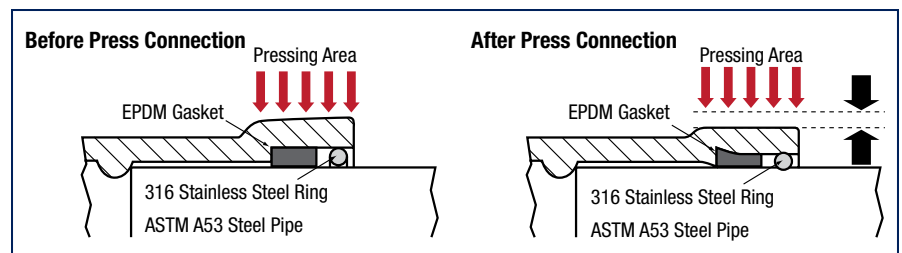

ISO Certified, IAPMO Approved, NSF 61-4 Certified

FASTLOCK™ fittings are made from malleable cast iron. The annealing process used in their manufacturing provides them with a greater malleability well suited for press connections. During manufacturing, all **FASTLOCK™** fittings are hot-dipped in 99.99% pure, molten zinc. This process completely coats the fittings' surface inside and outside, giving them additional strength and providing a resistance to oxide corrosion, making them excellent for use in drinking water systems.

FASTLOCK™ fittings ensure a tightly sealed connection utilizing a pre-assembled sealing gasket and stainless steel gripping ring. The thick EPDM sealing gasket provides a wide contact surface between the fitting and the pipe, ensuring the connection is air and water tight after pressing. The AISI 316L stainless steel ring grips the pipe and prevents it from pulling out, even in cases of very high pressure. Tabs on the fitting end retain the sealing gasket and stainless steel gripping ring.

The diagram below illustrates how all of these features provide **FASTLOCK™** fittings with a strong and secure press connection.

Pipes for FASTLOCK™

FASTLOCK™ fittings are for use with ASTM A53 compliant ½" – 2" schedule 10 through schedule 40 black and galvanized steel pipe only.

Press Tools for FASTLOCK™

FASTLOCK™ fittings must be used with **FASTLOCK™** approved press jaws only. **FASTLOCK™** jaws are compatible with press tools from Ridgid®, Rothenberger®, REMS®, and Stanley® VIRAX®. The press tool must be for sizes up to 2" with a press force of at least 32kN and operating either at 110 volts or on battery power.

Operating Parameters

Operating Temperature: 0° – 250° F

Maximum Operating Pressure: 200 PSI

Warranty

FASTLOCK™ fittings carry a 50 year limited warranty against defects in material and workmanship when properly installed and used under normal circumstances.

Approvals

ISO 9001:2000 Certified

IAPMO Approved: Uniform Plumbing Code

NSF-61-4 Certified

QUICK & EASY INSTALLATION

Verify the outside diameter of the pipe is compliant to ASTM A53 standards. Cut the pipe perpendicular to its axis.

Deburr the end of the pipe to avoid damaging the gasket. Make sure the pipe is free of debris, rust, paint, scale, etc.

Verify the presence, integrity and correct positioning of the gasket and metal ring. If necessary, lubricate the pipe and fitting with approved silicone spray.

Mark the insertion depth on the pipe. Insert the pipe into the fitting until it makes contact with the stop.

Complete the press connection using **FASTLOCK™** jaws in accordance with your press tool's instructions.

Verify the press connection.

NOTE: Connections MUST be made on ASTM A53 compliant pipe using **FASTLOCK™** approved jaws ONLY. The instructions above are provided as a brief overview of the installation process. Before using any **FASTLOCK™** products, read the complete Technical Manual. Complete installation instructions can be found in the Technical Manual or at www.fastlockfittings.com

ORDERING INFORMATION

FASTLOCK™ fittings are available from Cimberio Valve Company, Inc.

Freight Policy: Cimberio Valve standard freight terms apply to all orders placed for delivery to a single destination in the continental United States. Contact your local distributor for specific details. Otherwise, freight items are F.O.B. Malvern, Pennsylvania 19355. To read Cimberio Valve's complete freight policy, visit us online at www.cimberiovalve.com and click on the "Policies" link at the bottom of the page.

Order Acceptance: Orders are accepted by fax (877-232-9246) or e-mail (orders@cimberiovalve.com). Possession of any of our catalogs or list price books by any person is not to be construed as an offer to sell to that person. All prices are subject to change without notice.

Minimum Order: There is NO minimum order at Cimberio Valve.

Payment Terms: All invoice terms are Net 30 from the date of Cimberio Valve invoices. Invoices may now be paid by credit card. Cimberio Valve accepts Visa, MasterCard, and Discover. Before paying by credit card you must fax a completed Credit Card Authorization Form to us at 877-232-9246. This form can be downloaded from www.cimberiovalve.com on the "Policies" page (the link appears on the bottom of the page) or you can request the form by phone at 877-228-9246.
